

CALCULATORS

Middle School

A Texas Instruments TI-30XB is the preferred model for all Year 7 to Year 9 students in 2025.

Senior School

In 2023 we began transitioning from the Texas Instruments TI-84+ CE Graphics Calculator to the Casio fx-CG50AU Graphics Calculator.

The fx-CG50AU features a new high resolution colour display which enhances the learning experience. It provides more learning opportunities and calculates at a faster rate.

Year 10

In 2025, students studying General Mathematics, Mathematical Methods or Specialist Mathematics will be required to have the Casio fx-CG50AU. Students studying Essential Mathematics **are not** required to purchase a calculator until Year 11.

Year 11

In 2025, students studying any level of Mathematics will be required to have the Casio fx-CG50AU.

Year 12

In 2025, students studying any level of Mathematics will be required to have the Casio fx-CG50AU or the Texas Instruments TI-84+ CE calculator.
